Property on Mill Street

Dear Sirs:

Last year I purchased three lots with the full intentions of moving my current modular home to that site. Because of purchasing the land in August, I quickly found out that with everything that needed to happen it was to late in the year.

After the first of the year, I contacted the same people and they told they were extremely busy and did not know if or when they would get to it because covid had pushed everything back as well as what the price might be. I moved forward asking for a quote to move the home and the gentleman came out but has never gotten back to me with a quote or any indication that he is willing to do the job.

I have found I new lender as of today that may be able to help us get the financing for the move as well as refinancing the home and the land together as a conventional loan.

With that I would like to ask for a one-year extension before having to pay full price on the three lots located on Mills Street. Thank you for your time and consideration to make this extension possible

Sincerely,

Josephine Garrison
